

NON-CONTACT HV DETECTOR

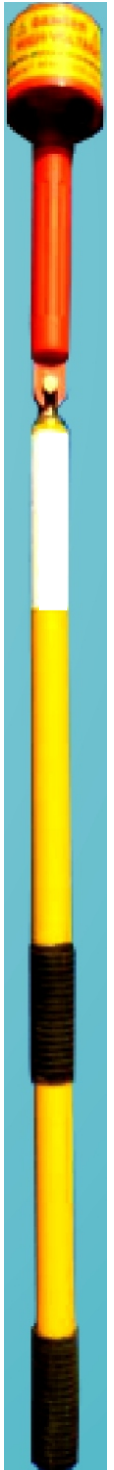

Model : QHBT-1

Check the presence of voltage from Ground

Features

- 8 Voltage settings : 240VAC, 2KV, 6KV, 11KV, 22KV, 33KV, 132KV, and 275KV
- High Bright LED Visual Indication
- Sound Indication
- Easy to proof method
- Self - test selection
- Battery Operated 3 X 1.5V " C " Batteries
- Non-contact principal by proximity
- Compatible with Insulated FRP sticks
- Light weight, robust and compact
- Suitable for indoor and out door applications
- Detect even Low voltage on any systems
- Easy access to Batteries
- No special part needed
- Simple and efficient to use

The Voltage Detector HVD-275A is a high voltage proximity detector. It has eight voltage detection settings from 240Vac to 275KV.

The HVD-275 consists of an internal pickup sensor plate a sensitivity selector, a visual and sound annunciator.

Voltage Detectors available in various voltage range can be use with our highly insulated glass epoxy insulated sticks

Voltage Detector is easy to use & it is non contact type, gives you visual and audible indication for presence of voltage in the line / conductor / cable from the ground level, without making contact with conductor / cable, you can have perfect indication, whether line is live or absence of current

Note : Size, shape layout and color of the instrument may change as per the suitability and betterment of product without any information
